DESCRIPTION	<p>North Stonington has a K-12 gifted and talented program. There is one teacher who spends 50% of the time at the elementary school and 50% at the middle/high school. At the elementary school, the teacher works with each grade level team of teachers and provides enrichment activities in all classrooms for a limited period of time. In addition to classroom enrichment, identified students participate in small group or individual investigations and/or accelerated programs. At the middle school, the teacher again works with grade level teams to develop enrichment opportunities within the classroom setting. Students participate in competitions such as Invention Convention, Geography Bee, and Math Olympiads. The teacher is also available to assist students with small group or individual investigations. At the high school level, the teacher serves as a resource to students and faculty. High school students have the opportunity to serve as mentors to elementary students. When scheduling permits, programs such as Future Problem Solving are offered.</p>
